Review:

One of the best Black Death Metal debut albums I've hear in a while! Although this is released back in 2010, I've only got the chance to listen to it now. This Canadian quintet released with Flames of Blood one memorable piece of Metal, I tell you; each and every track is memorable and has at least one feature to make capture your attention, but overall the band impresses through the vocalist's ferocity (made me think of Czech Avenger), the occasional groovy but at the same time aggressive drumming, the doomy bass lines, and the guitarists' creativity. Great stuff, I'll spin it a bit more and after I'll pass to their second album sent for a review as well. Get your hands on this CD, yes, the sound is a bit dirty and unpolished, but that makes it even more genuine!
